

Cirque Corporation

Information Sharing and Document Repository Policy

Document ID: IS-CIRQ-P-039-G

Category: Information Management

Division: Policy

Type: Global

Version: 1.0

Effective Date: March 2026

Review Date: March 2027

Approved By: CTO, General Counsel

Generated: March 02, 2026

1. Introduction

Effective information sharing and centralized document management enable Cirque Corporation employees to access the information they need while maintaining security and compliance.

2. Purpose

This policy establishes requirements for the centralized document repository, information sharing practices, and access controls to ensure appropriate availability of corporate information.

3. Scope

This policy applies to all corporate documents, policies, procedures, forms, templates, and other information shared among Cirque employees.

4. Centralized Document Repository

Cirque maintains a centralized document repository for:

- Corporate policies and procedures
- Employee handbook and HR documents
- IT standards and guidelines
- Forms and templates
- Training materials

- Job descriptions
- Organizational charts
- Process documentation

5. Repository Platform

The official document repository is located:

- Primary: SharePoint/OneDrive shared drive
- Alternative: Designated shared network drive
- Access: Through company network or VPN
- URL/Path: [To be specified by IT]

6. Document Organization

Documents shall be organized by:

- Department or functional area
- Document type (policy, procedure, form, etc.)
- Logical folder structure
- Consistent naming conventions
- Version control for updated documents
- Metadata tags for searchability

7. Document Types and Ownership

Document categories include:

- Policies: Owned by executive leadership, approved by Board/CEO
- Procedures: Owned by department heads
- Forms/Templates: Owned by functional area managers
- Job Descriptions: Owned by HR
- Training Materials: Owned by respective departments

8. Access Controls

Repository access shall be:

- All employees: Read access to public documents
- Managers: Read/write access to their department folders
- HR: Full access to employee and HR documents

- IT: Administrative access for management
- Contractors: Limited access as defined in agreements

9. Document Publishing Process

To publish documents to repository:

- Document created and reviewed by owner
- Approved by appropriate authority
- Verified for accuracy and compliance
- Uploaded to appropriate folder
- Superseded versions archived or removed
- Employees notified of important updates

10. Version Control

All documents shall include:

- Version number and date
- Change history or revision log
- Approval signatures/dates
- Review/expiration dates
- Previous versions archived for reference

11. Information Sharing

When sharing corporate information:

- Use official repository link, not email attachments (when possible)
- Respect access controls and permissions
- Do not share confidential documents publicly
- Follow Data Classification Policy
- Use secure methods for sensitive information

12. User Responsibilities

All employees shall:

- Access documents from official repository
- Report broken links or outdated documents
- Not maintain personal copies of frequently updated documents

- Not redistribute documents externally without authorization
- Provide feedback on document usefulness

13. Document Review and Maintenance

Document owners shall:

- Review documents at least annually
- Update documents when processes change
- Remove or archive obsolete documents
- Ensure consistency across related documents
- Maintain current contact information

14. Training and Communication

New employees shall:

- Be informed of repository location during onboarding
- Receive training on how to access and use repository
- Know where to find key documents (handbook, policies, etc.)

Regular reminders sent about repository and key document updates.
